EXPERIENCE

Software Developer 1

JFrog (JavaScript, React.js, Redux, Jest, Cypress, Appli-tools, Git, GitHub, SonarQube)

📅 October 2023 - Present 📍 Bengaluru , India

- Reduced frontend **bundle size** using **code splitting** and **lazy loading**, improving page load performance.
- Enhanced frontend efficiency by optimizing component rendering cycles using **React's performance hooks (useMemo, useCallback, React.memo)**, resulting in smoother Frontend interactions.
- Leveraged **Redux Toolkit's caching** capabilities to eliminate **redundant API calls**, enhancing scalability and accelerating data delivery to the client.
- Migrated **React class components to functional components** using **React 16.8 hooks**, standardizing state management to **improve Developer Experience (DX) and streamline deliverables**.
- Contributed to **frontend testing, including E2E and visual testing with AppliTools**, improving confidence in UI stability and preventing regressions.

SDE Intern

Spyne.ai (JavaScript, React.js, Redux, Jest, Cypress, Playwright, AppliTools, Git, GitHub)

📅 April 2023 - Oct 2023 📍 Gurgaon , India

- Built High Performace Frontend UI for AI tools Project of the company including **PhotoUpscaler** and **Background Remover**
- Made Dynamic Front-End UI using Vanilla JavaScript and using various ES6 Functionalities
- Hoisting and template literals was used to dynamically allocating different classes to the DOM elements

SDE intern

TCTS (Tata Communication Transformation Services)

📅 Oct 2022 - March 2023 📍 Pune , India

- Worked on a **Ticket Raising System** for Site Engineers and Managers in the Organisation
- Worked With Legacy Classed Based Components of React.js making lot for functionalitis to be a reusable
- Using the functionality of **useCallBack** and **useSelector** in order to avoid multiple api calls component

ACHIEVEMENTS

Problem Solving

- Solved **400+ Data Structure & Algorithm problems** across:
 - [LeetCode](#)
 - [GeeksforGeeks](#)

EDUCATION

B.Tech. (CSE) - 9.5 CGPA

Chitkara University

📅 August 2019 - June 2023

PROJECTS

React Meals

- Used **useReducer**, **useRef**, **useState**, **useContext** kind of Hooks .
- To Be Implemented with **Redux** and adding store for state managment and to add some optimization with **useCallBack**, **useMemo**, **React.memo** and to use **Fetch** browser API for sending order placed to Backend
- managing the data to be drilled to the child components using **useContext** .
- updating the data in the modal by managing **Cart** component by passing **Ref** **useRef**.

React Headspace

- Preventing Multiple API call from FrontEnd side by **UseEffect** Hook can be observed in Console.
- Validating if the inputs are valid and managing states using **useReducer**.
- Passing data only to the components needed using **useContext**.

React List Handler

- Managing modal state for **INVALID** name or **AGE** input using **useState** Hook
- Added **Two Way Binding** for lifting state up from child to parent, for updating the List of Users

TECHNICAL SKILLS

Programming & Development

- **JavaScript (ES6+)**, **React.js**, **Redux**, **Node.js**, **Express.js**

Testing Frameworks

- **Jest**, **Playwright**, **Cypress**, **AppliTools**, **Unit & E2E Testing**

Version Control & Tools

- **Git**, **GitHub**, **BitBucket**, **SonarQube**
